"Reading is to the mind what exercise is to the body."--Addison.

BOOKS RECENTLY RECEIVED

ANNUAL REVIEW OF PLANT PHYSIOLOGY, edited by D. I. Arnon and L. Machlis. Annual Reviews, Inc., 1950. 364p.

This is the first issue of a new publication. Within certain limits set forth in the preface to the volume, "the mission of the Annual Review of Plant Physiology is to provide annually a critical evaluation of all branches of plant physiology." The titles of some of the papers in this volume are : Mineral Nutrition, Influence of Light on Plant Growth, Growth Regulating Substances in Horticulture, Herbicides, Respiration of Higher Plants, Water Relations of Plant Cells and Tissues, Soil Moisture in Relation to Plant Growth, Soil Chemistry in Relation to Inorganic Nutrition of Plants. At the end of each paper is a list of the literature cited ranging in length from fifty to over three hundred items. Unfortunately, titles of the publications are not given.

A BETTER LIVING FROM YOUR SOIL, edited by Jim Roe and William Raufer. 1949. 106p. 56.7 SulB

A Successful Farming publication. The illustrated articles are grouped under four headings: Tilth, Erosion, Fertility, and High Yields.

FINANCING THE FARM BUSINESS, by I.W. Duggan and R. U. Battles. Wiley, 1950. 354p. 284.2 D872

This book is designed to cover most of the important financial problems which confront young farmers. In Part I, Principles of Farm Financing, the authors have covered the problems of inheritance and farm leasing as well as the principles of sound credit. In Part II, Sources of Agricultural Credit, they have attempted to describe objectively the significant features of the most important institutions that lend money to farmers and to their cooperative organizations.

IRRIGATION PRINCIPLES AND PRACTICES, by O. W. Israelson. Second edition. Wiley, 1950. 405p. 55 Is7 Ed.2

This new edition has only eighteen chapters in comparison with twenty-four chapters in the first edition, though the new edition is shorter by only fifteen pages. The chapters have been entirely re-written with a partial re-distribution of subject matter. Actually the new book covers the same subjects included in the old edition plus a chapter on the drainage of irrigated lands. Some new tables and figures are found in the new text. The references have been revised and brought up-to-date. They are arranged by chapter in an appendix instead of

at the end of each chapter as in the first edition.

SECRETARIAL EFFICIENCY, by F. A. Faunce and F. G. Nichols. Gregg Pub. Co., 1948. Second edition. 502p. 249.2 F27 Ed.2

This is the revision of a book which has been very popular with our secretaries. The authors say in the preface that "this book will serve those who wish to read authoritative material for self-improvement, as time allows. It will serve equally well those who desire to make an intensive study of the secretarial profession. And as a book of reference for secretaries and others it will be found valuable." The twenty-four chapters are divided into seven parts entitled Efficiency and Personality, The Industrious Secretary, Handling Communications, Filing and Finding Material, The Importance of Time, The Value of Words and Figures, and The Secretary Meets the Test.

WILDLIFE FOR AMERICA: THE STORY OF WILDLIFE CONSERVATION, by E. H. Graham and W. R. Van Dersal. Oxford University Press, 1949. 110p. 412.9 G76

A beautifully illustrated little book written especially for children, but with appeal for grown-ups, also. Of value for educational work.

PLEASE NOTE

Because of a reduction of the Library budget for the fiscal year, the free photostat and microfilm services initiated a few years ago by the Library must be discontinued. However, continue to send your requests for these services to the Branch library and we will follow this procedure:

1. If available from our collection, we will fill the request by lending the original.
2. If not available in the Branch collection, we will forward the AD-245 to the Department Library.
3. The Department Library will fill the request by lending the original or by notifying the Branch library that the publication is not available for loan and that a photoprint can be supplied at the prices quoted on the regular photocopy order form, Lib. 60 (Rev.).
4. Photoprints, in lieu of loans, will be supplied, on the same basis as they have heretofore been provided, to those bureaus which arrange for the lump sum service (Library Memorandum No. 8, paragraphs 4 and 5). To date these are BPISAE, EPQ, and FCA. SCS requests should be forwarded to the Main Library, which will obtain purchase orders from SCS's Washington Office.
